EXPERIENCE THE COLOURS OF NATURE AND LIGHT WITH THE ASTERIA LAMP

Born at the crossroads of design, technology and craftsmanship, the Asteria series of lamps incorporate built-in LED lights into a sleek, minimalist shape. Casting a bright, lively light, Asteria comes in a seductive and modern six-colour palette to match and complement any interior design, from a contemporary or high design decor to a futuristic or even retro one. Place it above the coffee table or dinner table; its slim shape will ensure that nothing obscures the view of guests sitting opposite you and its diffused light will ensure a blind-free glow.

“The illusion of earthly weightlessness had to be challenged by a light design that defies gravity. Today’s LED technology makes for thinner and smaller lighting fixtures, but they still have to resemble a lampshade. The Asteria is just so – slim and simple, a stroke of light hovering above, a touch of the future and yes, breath-taking, like stars in space!” explains Soren Ravn Christensen, Founder and Chief Creative Developer.

We take the story of Scandinavian design further than ever before by combining aesthetics, simplicity and functionality and infusing it with thoughtful craftsmanship and environmental care. Our designs are deeply rooted in the diverse urban landscape and raw nature surrounding our home in the heart of Copenhagen, Denmark. Having begun our journey in November 2008, we are celebrating our 10th anniversary this year by constantly growing and expanding the conventions around contemporary design.
